Purchasing an NFT Instruction Sheet

1. Purchasing an NFT is easy, but you need to set yourself up a wallet first. A wallet is an app that keeps your official records safe and allows you to buy and we recommend MetaMask.
2. Download the MetaMask app on your phone or desktop, or visit the website: metamask.io where you can set up a secure wallet.
3. You will need to fund your wallet which you can do using a credit or debit card. This turns your currency into cryptocurrency which will enable you to purchase your NFT.
There will be a few steps involved but the process is quite straightforward.
4. Once the steps are complete and you can see the funds in your wallet, you can then purchase your NFT using the 'Place Bid' or 'Buy Now' function.
5. Once the transaction is complete you will see your NFT appear in your MetaMask wallet.
